How to Become an Authorized Dealer of NetGain Controls, Inc.

WarP-DriveTM

Controllers and Accessories

NetGain Control's business is the design, development, manufacturing and distribution of high quality, high power controls for the Electric Vehicle (EV) community. We only sell through Authorized Dealers who have demonstrated a knowledge and understanding of electric vehicle design and safety.

To become one of our Authorized Controller Dealers, you must have a business registered with your local government's taxing authority and possess documentation authorizing you to collect any required sales tax.

Minimum first order must be for three (3) controllers. After the initial order - no order minimums are required the first year. Authorized Dealer status is maintained by purchasing (3) additional controllers each year thereafter. Your purchases may qualify you for participation in our ***Advertising Rebate Program***.

At no time will NetGain Controls, Inc. be liable to pay sales tax to your local governing bodies as a result of our selling your company any product. Sales tax liability is your sole responsibility.

Please complete the "**Dealer Application**" and e-mail a scanned copy of it back to us at sales@ngcontrols.com along with a scanned copy of your local government's business license and sales tax resale certificate.

Once we have verified all the information, we may conduct a telephone interview with you. We want to know what your business background is, how long you have been in the EV business, what projects you have worked on, but most importantly, we want to know you. If you are new to the business world, we can offer some sound advice. We will then forward a copy of our "**Dealer Agreement**". This Agreement must be signed and the signature page and address pages scanned and returned to NetGain Controls, Inc.

When the Agreement has been accepted by NetGain Controls, Inc., we will add a link on our Authorized Dealer web page, as well as providing you with a login and password that will allow you access to the Dealer Only area of our web page where you can view Dealer pricing information.

Since we do not sell direct to any end users, we realize that our Dealers are our most important asset. We want to serve you in the ways you need us to.

When an end user contacts our offices, we will answer technical questions and give any aid possible. The end user will then be directed to our web site to view the list of Authorized Dealers and choose whom they wish to make a purchase from. If the end user does not have Internet access, we will direct them to the Authorized Controller Dealer who is geographically closest to their location, assuming the Dealer is in good standing.

At any time, feel free to contact us directly. We are here for our Dealers and can frequently be reached after regular business hours and sometimes even on weekends.
